

Acuitis

Let's look at the world differently

Acuitis offers original and high quality creations, at prices accessible to all. It is a family story that was created in 2010 by Daniel and his son Jonathan, with over 40 years of expertise in the world of optics and hearing.

Acuitis has a rich network of 131 points of sale in the world and has established itself as a reference address in the field of optics and hearing.

Acuitis stores offer a wide range of frames. Original creations, imagined by the French eyewear artist Frédéric Beausoleil, are available in a range of materials: cellulose acetate, wood, bamboo, magnesium, carbon, etc. For lenses, **Acuitis** relies on Essilor, a true reference in terms of optical innovation. The manufacturer is particularly renowned for the revolutionary treatment of its progressive lenses.

Each **Acuitis** has a sales area dedicated to eyesight, as well as a Biophone area, a state-of-the-art acoustic observatory, which enables hearing to be tested and the guests' hearing aids to be adjusted in an optimal manner.

The strength of **Acuitis** lies in its double expertise, and we invite you to come and discover it.

EXPANSION PLANS

10-15 locations in the next 2-5 years across Canada

SPECIFICATIONS

Enclosed malls & exterior locations
from 1,800 – 2,500 sq. ft
